

AMENDMENTS TO THE CLAIMS:

1. (Currently amended) A photo service system structured in an area, said photo service system comprising:

a digital camera which transmits image data of images captured by the digital camera and identification information for identifying with the digital camera;

a base station which receives the image data and the identification information transmitted from the digital camera; and

a photo service center which prints the images according to the image data received by the base station and sorts the prints of the images according to the identification information received with the image data,

wherein the photo service center identifies the prints of the images based on a location corresponding to the ~~respective at least one~~ base station that transmitted the image file.

44. (Currently amended) A photo service system structured in an area, said photo service system comprising:

a digital camera which transmits image data of each image captured by the digital camera and identification information for identifying with the digital camera;

a plurality of base stations that selectively receive image data and identification information transmitted from the digital camera based on a location of said camera at a time of transmission of each image;

a photo service center that automatically prints each image upon receipt of the image data of each captured image by the base station and sorts the prints of the images according to the identification information received with the image data, and

identifying each of the prints of the images based on a location corresponding to ~~each of the~~ at least one base station of the plurality of base stations that transmitted the image file,

wherein the photo service center identifies the prints of the images based on a location corresponding to the respective at least one base station of the plurality of base stations that transmitted the image file.
